

Logo usage guideline

Which file to use

Logo-Full-Navy

Primary lockup, navy on transparent — default choice on white/light backgrounds.

Logo-Full-Reversed

Primary lockup, ivory on transparent — use on Deep Navy or dark backgrounds only.

Logo-NoTagline-Navy / -Reversed

Same lockup without the tagline — for small placements or when space is tight.

Icon-Gold

Bare arc + pylon mark, transparent — favicon, watermark, small corner accents.

Icon-Badge-Navy

Arc + pylon enclosed in a navy circle — app icons, social avatars, anywhere a self-contained badge is needed.

Clear space & minimum size

- Keep clear space of at least 1X on every side, where X = the cap height of the "H" in HLS.
- Full lockup: 320px / 2 in wide minimum. No-tagline: 160px / 1 in minimum. Icon: 32px minimum (favicon), 44px (app icon).
- Below minimum size, drop the tagline, then the descriptor line, then fall back to the icon.

Color & do/don't

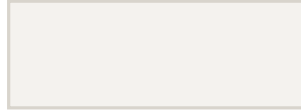

Brand colors

Deep Navy
#0D1B2A

Warm Gold
#C8A45E

Warm Ivory
#F4F2EE

Slate Gray
#6B7280

Do

- Use the supplied PNG files as-is — do not recreate or retrace the mark.
- Keep the arc's sharp butt-cap ends and the pylon's square corners.
- Use the reversed version on dark backgrounds, never the navy version.

Don't

- × Don't stretch, skew, or distort the proportions.
- × Don't recolor the mark outside the approved palette.
- × Don't rotate the mark or round the pylon's corners.
- × Don't add drop shadows, glows, gradients, or outlines.
- × Don't place the navy or gold version on a low-contrast or busy background — use the reversed or badge version instead.
